

PRESS RELEASE 2020 – WEEK 45

Towing deer instead of bicycles

Rameder offers convenient transport solution for hunting, fishing and more

A customer survey by Rameder showed that most towbars are also used for bike carriers, at least occasionally. But the clever hitch at the back of your car has a few other uses as well. The game carrier Deep 210, for example, is ideal for hunters. It is available from the company's online shop at www.rameder.eu and can be equipped with a number of convenient options. But it is not only come in handy in forests and fields, but also on trips to the DIY store. Bags of soil or cement, for example, can be transported without getting the interior of the vehicle dirty.

400.000 hunters were registered in the UK for the year 2018. For this target group, and of course for anglers as well, **Rameder** as Europe's largest supplier for passenger car transport solutions offers the Game carrier Deep 210. The sturdy transport basket can be attached to the towbar in a matter of seconds using the lockable one-hand lever. And those who do yet not own a towbar will find an unrivaled selection of suitable products from market leader **Rameder**. Of course the range covers the popular "hunting" cars such as the Suzuki Jimny, Lada Niva, Mercedes G-Class and many others. But back to the Deep 210: The product is "made in Germany" and manufactured from sturdy square tubes, which are hot-dip galvanized for optimum corrosion protection. The basket offers generous inside dimensions of 960 x 470 x 205 mm. If the hunt has produced a large haul, the optional Lowering device will come in handy. It facilitates loading and allows access to the trunk even while the carrier is mounted.

The food-safe, impact-resistant and shatter-proof Game tub is another clever option. It prevents liquids from dripping onto the ground, but is also an important transport tool on its own: Its special front section and integrated runners allow it to be used as a sled for recovering killed game and transporting it to the car on difficult terrain. It can then be attached to the game carrier using bungee straps. After use, the robust, UV-resistant plastic tub can simply be washed down with a hose or pressure washer. Easy, hygienic cleaning in no time at all! Tip for smart spenders: Buy as a complete set together with the game carrier Deep 210. More interesting optional accessories include the Load securing net, the Tub tarpaulin and the Game tub lid. A light kit including a license plate holder is available for use on public roads. This ensures that nothing is covered up even with large loads so the vehicle is always safe to use.
