

PRESS RELEASE 2022 – WEEK 09

The great pull of electromobility Rameder towbars for the Hyundai IONIQ 5

The Hyundai IONIQ 5 has just been named “German Car of the Year 2022”. A towbar can multiply the application options of the fully electric SUV, whether for the next day out or for a mundane trip to the recycling center with your garden waste. Rameder, Europe’s largest supplier for car transport solutions, offers suitable retrofit systems for the IONIQ 5 in its online shop at www.rameder.eu.

Do you need a trailer only occasionally? Then a detachable towbar that is inserted from underneath would be a good choice. **Rameder** now offers this model for only 429 euros instead of the RRP of 670 euros. With a vertical load of 119 kg, this allows the Hyundai IONIQ 5 to tow a load of up to 1630 kg. With an alternative detachable towbar, the IONIQ 5 can even tow as much as 1700 kg (vertical load: 110 kg). This model is now available from **Rameder** at a price of only 428 euros. A matching electrical kit is also required, with the universal 13-pin model available at **Rameder** from 65 euros.

Rameder now offers a rigid towbar with a bolted-on tow ball in its online shop at www.rameder.eu for just 221 euros. As a complete set including a 7-pin electrical kit, this towbar comes to only 267 euros at **Rameder**. The detachable variant of the 1.7 ton-towbar can be ordered from **Rameder** online as a complete set for 483 euros.

Of course the market leader for towbars offers a suitable hitching unit for virtually any current vehicle. With just a few clicks, owners can quickly find the right towbar for their car on the clearly structured **Rameder** online portal.
